I certify that the above information is correct. I give specific consent for test analysis and fully understand the implications of the test(s). I have received adequate pre test counselling. I hereby request and agree that all my pathology accounts from Drs.Shaw,Roux&Partners ("PathCareNamibia") may be sent to my nominated email address and cellphone number, to my medical aid administrators, medical practitioner and/or insurance company. I indemnify PathCare against action that may be brought by virtue of this request and I understand that it is entirely my responsibility to safeguard access to my email. I undertake to pay outstanding monies not covered by medical aid.

Nasopharyngeal (NP) swab Oropharyngeal (OP) swab

Specimen requirement:

Single nasopharyngeal swab placed into the supplied tube; If not available, an oropharyngeal swab placed into the supplied tube
Transportation: cold, on ice if transport is expected to exceed 6 hours

By requesting the above test, I confirm and acknowledge the following:

- I do not currently suffer from any COVID-19 symptoms and signs, including fever, flu-like symptoms, loss of smell and taste, muscle pains, shortness of breath, etc.
- I am not currently in self-isolation due to exposure to a COVID-19 infected individual.
- I realise that this screening test is only for travel purposes. It is not for diagnostic or clinical purposes.
- I understand that PathCare has no duty or responsibility towards me, regarding any further clinical management and treatment, whether the test is positive or negative.
- If the test is positive, it will be my duty and responsibility to self-isolate with immediate effect and to obtain medical assistance if indicated.
- I realise that COVID-19 is a notifiable disease and that the Ministry of Health & Social Services will be informed accordingly.
- Travelers testing positive for COVID-19 are presumably asymptomatic. While false positive COVID-19 PCR tests occur, false negative tests are often also seen, especially in asymptomatic patients. Subsequent tests may prove negative, depending on a range of factors including but not limited to the shedding rate of the virus, immune response and sample quality. I understand that PathCare may share my result with the embassy/consulate of the country/ nominated service provider, I intend to enter, should they receive such a request
- After completion of the isolation period required with COVID-19 infection, non-infectious RNA can persist and be intermittently shed for up to 3 months in a subset of patients. This has important implications for SARS-CoV-2 PCR testing prior to travel. Please consider this for travelling plans and check with your airline if relevant.
- Drs Shaw, Roux & Partners takes no responsibility for ANY claims of whatsoever nature or of any consequential losses relating to test results falling within the aforementioned category or for any tests deemed not valid for travel by any airline or country.
